Journal of Alloys and Compounds 288 (1999) 329–333

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 288

a.c. susceptibility
magnetic responses of a high-T_c semi-reversible YBCO superconductor 249
Amorphous antimony
influence of the structure of the electrodeposited antimony substrate on indium diffusion 255
Antiferromagnetic transition
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32
Atomic nitrogen
nitrogen storage properties based on nitrogenation and hydrogenation of rare earth–iron intermetallic compounds R_2Fe_{17} (R=Y, Ce, Sm) 141

Ball milling
nanocrystalline magnesium for hydrogen storage 217
BCC alloy
the hydrogen storage characteristics of Ti–Cr–V alloys 294
Borides
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32
Boron rich
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32
B_{12} icosahedra
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32

Calcium halide flux deoxidation
calcium-deoxidation of niobium and titanium in Ca-saturated $CaCl_2$ molten salt 173
Carbonation
volume expansion and Curie temperature in $RFe_{11.35}Nb_{0.65}C_x$ compounds 57
Carboreduction of rutile-titanium dioxide
X-ray diffraction study of Ti–O–C system at high temperature and in a continuous vacuum 124
Ceramic oxides at high temperature
X-ray diffraction study of Ti–O–C system at high temperature and in a continuous vacuum 124
CeRhSb
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7
Charge–discharge cycle
thermal cyclic charge and discharge stability of nanocrystalline Mg_2Ni alloy 312
Chemical bonding
electronic and bonding properties of ANi_2P_2 (A=Ca, Sr, Ba) 88
Cobalt–zinc interface
phase formation and reaction kinetics in Co–Zn diffusion couples 164

Coercivity
investigation of simultaneous enhancement of remanence and coercivity in Nd–Fe–B/Nb mixed-powder sintered magnets 226
Combustion synthesis
combustion synthesis of Zr–Si intermetallic compounds 238
Copper leaching
on the transformation of $TlCu_3Se_3$ to o-$TlCu_4Se_3$ 110
Critical current density
magnetic responses of a high-T_c semi-reversible YBCO superconductor 249
Critical point
electrical conductivity measurements for immiscible In–Se–Te alloys 151
Critical state model
magnetic responses of a high-T_c semi-reversible YBCO superconductor 249
Crystal field excitations
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7
Crystal growth
optical spectra of a $LaGaO_3$ crystal singly doped with chromium, vanadium and cobalt 262
Crystalline antimony
influence of the structure of the electrodeposited antimony substrate on indium diffusion 255
Crystal structure
magnetic ordering in $HoFe_6Ge_6$ studied by neutron diffraction 50
the ternary system neodymium–cobalt–boron 170
evaluation techniques of cycling effect on thermodynamic and crystal structure properties of Mg_2Ni alloy 269
possible origins of superconductivity in $PrBa_2Cu_3O_x$ compound viewed from results of single crystal structure study 319
Curie temperature
volume expansion and Curie temperature in $RFe_{11.35}Nb_{0.65}C_x$ compounds 57
Cycling effect
evaluation techniques of cycling effect on thermodynamic and crystal structure properties of Mg_2Ni alloy 269

Degradation
mechanism of rapid degradation of nanostructured Mg_2Ni hydrogen storage alloy electrode synthesized by mechanical alloying and the effect of mechanically coating with nickel 286
Diffusion coefficient
influence of the structure of the electrodeposited antimony substrate on indium diffusion 255
Direct valence
the direct force on electromigrating hydrogen isotopes 1

Electrical resistance
magnetic behavior of a new compound, Gd_2PdGe_3 61
Electrical resistivity
calcium-deoxidation of niobium and titanium in Ca-saturated $CaCl_2$ molten salt 173

Elsevier Science S.A.
PII: S0925-8388(99)00218-2

Electrical transport
electrical conductivity measurements for immiscible In–Se–Te alloys 151
Electrochemistry
production of niobium powder by electronically mediated reaction (EMR) using calcium as a reductant 200
Electromigration
the direct force on electromigrating hydrogen isotopes 1
Electronic structure
electronic and bonding properties of ANi_2P_2 (A=Ca, Sr, Ba) 88
EMF cells
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
Enthalpy
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
Entropy
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
Erbium germanide
orthorhombic Er_2Ge_5, with a $ZrSi_2$–$DyGe_3$ intergrowth structure 183
Erbium germanide structure
orthorhombic Er_2Ge_5, with a $ZrSi_2$–$DyGe_3$ intergrowth structure 183

Fe/Cr multilayers
hydrogen-induced changes of magnetic properties of iron–chromium multilayers 13
Fe–Cu system
metastable BCC and FCC alloy bulk bodies in Fe–Cu system prepared by mechanical alloying and shock compression 299
Ferromagnetism
on the ferromagnetism of AuMnSn 117
Fe–Ta alloy
metastable crystalline phases formed in the Fe–Ta system by solid-state reaction 159

Gd_2PdGe_3
magnetic behavior of a new compound, Gd_2PdGe_3 61
Gibbs energy of formation
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
GMR
hydrogen-induced changes of magnetic properties of iron–chromium multilayers 13
Ground state properties
electronic and bonding properties of ANi_2P_2 (A=Ca, Sr, Ba) 88
Growth kinetics
phase formation and reaction kinetics in Co–Zn diffusion couples 164

Hard magnetic materials
structure of melt-spun $Nd_8Fe_{86.6}Nb_{5.4}$ and hard magnetic properties of its nitride 306
HDDR process
structure change in Sm–Fe–B–Ti permanent magnet materials induced by HDDR process 277
Heat capacity
magnetic behavior of a new compound, Gd_2PdGe_3 61
High pressure
site distribution and hyperfine parameters of tin impurities in α manganese 25
high-pressure synthesis and crystal structure of Sr_2MgH_6 197
High temperature X-ray diffraction
X-ray diffraction study of Ti–O–C system at high temperature and in a continuous vacuum 124
High-T_c superconductor
magnetic responses of a high-T_c semi-reversible YBCO superconductor 249
Hydriding kinetics
improved kinetics by the multiphase alloys prepared from Laves phases and $LaNi_5$ 229
Hydrogenation
nanocrystalline magnesium for hydrogen storage 217
Hydrogen implantation
hydrogen-induced changes of magnetic properties of iron–chromium multilayers 13
Hydrogen isotopes
the direct force on electromigrating hydrogen isotopes 1
Hydrogen storage
evaluation techniques of cycling effect on thermodynamic and crystal structure properties of Mg_2Ni alloy 269
the hydrogen storage characteristics of Ti–Cr–V alloys 294
thermal cyclic charge and discharge stability of nanocrystalline Mg_2Ni alloy 312
Hydrogen treatment
site distribution and hyperfine parameters of tin impurities in α manganese 25

Indium
influence of the structure of the electrodeposited antimony substrate on indium diffusion 255
Indium antimonide
influence of the structure of the electrodeposited antimony substrate on indium diffusion 255
Interlayer coupling
hydrogen-induced changes of magnetic properties of iron–chromium multilayers 13
Intermetallic compound layers
phase formation and reaction kinetics in Co–Zn diffusion couples 164
Intermetallic compounds
structure of melt-spun $Nd_8Fe_{86.6}Nb_{5.4}$ and hard magnetic properties of its nitride 306
Intermetallics
on the ferromagnetism of AuMnSn 117
combustion synthesis of Zr–Si intermetallic compounds 238
Interstitial type metal nitrides
nitrogen storage properties based on nitrogenation and hydrogenation of rare earth–iron intermetallic compounds R_2Fe_{17} (R=Y, Ce, Sm) 141
Iron alloys
structural and Mössbauer spectroscopic study of hexagonal Laves-phase $Zr(Fe_xCr_{1-x})_2$ alloys and their hydrides 42
Iron nitrides
ε-Fe_3N: magnetic structure, magnetization and temperature dependent disorder of nitrogen 79
Itinerant-model
volume expansion and Curie temperature in $RFe_{11.35}Nb_{2.65}C_x$ compounds 57

Kondo insulator
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7

$LaGaO_3$
optical spectra of a $LaGaO_3$ crystal singly doped with chromium, vanadium and cobalt 262

$LaNi_5$
improved kinetics by the multiphase alloys prepared from Laves phases and $LaNi_5$ 229
Laves phases
structural and Mössbauer spectroscopic study of hexagonal Laves-phase $Zr(Fe_xCr_{1-x})_2$ alloys and their hydrides 42
improved kinetics by the multiphase alloys prepared from Laves phases and $LaNi_5$ 229

α Manganese
site distribution and hyperfine parameters of tin impurities in α manganese 25
Magnesium powders
nanocrystalline magnesium for hydrogen storage 217
Magnetic properties
magnetic properties of Nd_2Al and Gd_2Al 76
Magnetic structure
magnetic ordering in $HoFe_6Ge_6$ studied by neutron diffraction 50
ε-Fe_3N: magnetic structure, magnetization and temperature dependent disorder of nitrogen 79
Magnetic susceptibility
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32
magnetic behavior of a new compound, Gd_2PdGe_3 61
Magnetism
spin-glass behaviour of disordered perovskite $LaNi_{1/2}Rh_{1/2}O_3$ 65
Magnetoresistance
hydrogen-induced changes of magnetic properties of iron–chromium multilayers 13
magnetic behavior of a new compound, Gd_2PdGe_3 61
Magnets
investigation of simultaneous enhancement of remanence and coercivity in Nd–Fe–B/Nb mixed-powder sintered magnets 226
Mechanical alloying
metastable BCC and FCC alloy bulk bodies in Fe–Cu system prepared by mechanical alloying and shock compression 299
Mechanical coating with nickel
mechanism of rapid degradation of nanostructured Mg_2Ni hydrogen storage alloy electrode synthesized by mechanical alloying and the effect of mechanically coating with nickel 286
Melt spinning
structure of melt-spun $Nd_8Fe_{86.6}Nb_{5.4}$ and hard magnetic properties of its nitride 306
Metal hydrides
structural and Mössbauer spectroscopic study of hexagonal Laves-phase $Zr(Fe_xCr_{1-x})_2$ alloys and their hydrides 42
Metallothermic reduction
production of niobium powder by electronically mediated reaction (EMR) using calcium as a reductant 200
Metamagnetism
influence of 5d-metal on magnetic properties of $UNi_{1-x}T_xAl$ compounds 36
magnetic properties of Nd_2Al and Gd_2Al 76
Metastable bulk alloy
metastable BCC and FCC alloy bulk bodies in Fe–Cu system prepared by mechanical alloying and shock compression 299
Metastable phase
metastable crystalline phases formed in the Fe–Ta system by solid-state reaction 159
Mg_2Ni
thermal cyclic charge and discharge stability of nanocrystalline Mg_2Ni alloy 312
Mg_2Ni alloy
evaluation techniques of cycling effect on thermodynamic and crystal structure properties of Mg_2Ni alloy 269
mechanism of rapid degradation of nanostructured Mg_2Ni hydrogen storage alloy electrode synthesized by mechanical alloying and the effect of mechanically coating with nickel 286
$Mg(OH)_2$
mechanism of rapid degradation of nanostructured Mg_2Ni hydrogen storage alloy electrode synthesized by mechanical alloying and the effect of mechanically coating with nickel 286
Miscibility gap
electrical conductivity measurements for immiscible In–Se–Te alloys 151
Mixed phases
improved kinetics by the multiphase alloys prepared from Laves phases and $LaNi_5$ 229
Modulated structure
on the first incommensurate ordering of $NH_4Cu_{7-x}S_4$ 102
Mössbauer spectroscopy
site distribution and hyperfine parameters of tin impurities in α manganese 25
structural and Mössbauer spectroscopic study of hexagonal Laves-phase $Zr(Fe_xCr_{1-x})_2$ alloys and their hydrides 42

Nanocrystalline
mechanism of rapid degradation of nanostructured Mg_2Ni hydrogen storage alloy electrode synthesized by mechanical alloying and the effect of mechanically coating with nickel 286
thermal cyclic charge and discharge stability of nanocrystalline Mg_2Ni alloy 312
Nd–Co–B
the ternary system neodymium–cobalt–boron 170
Nd-Fe-B/Nb
investigation of simultaneous enhancement of remanence and coercivity in Nd–Fe–B/Nb mixed-powder sintered magnets 226
Neutron diffraction
magnetic ordering in $HoFe_6Ge_6$ studied by neutron diffraction 50
ε-Fe_3N: magnetic structure, magnetization and temperature dependent disorder of nitrogen 79
on the ferromagnetism of AuMnSn 117
high-pressure synthesis and crystal structure of Sr_2MgH_6 197
Neutron powder diffraction
on the transformation of $TlCu_5Se_3$ to o-$TlCu_4Se_3$ 110
Neutron scattering study
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7
$NH_4Cu_7S_4$
on the first incommensurate ordering of $NH_4Cu_{7-x}S_4$ 102
Nickel oxides
spin-glass behaviour of disordered perovskite $LaNi_{1/2}Rh_{1/2}O_3$ 65
Niobium
calcium-deoxidation of niobium and titanium in Ca-saturated $CaCl_2$ molten salt 173
production of niobium powder by electronically mediated reaction (EMR) using calcium as a reductant 200
Nitriding
structure of melt-spun $Nd_8Fe_{86.6}Nb_{5.4}$ and hard magnetic properties of its nitride 306
Nitrogen absorption–desorption
nitrogen storage properties based on nitrogenation and hydrogenation of rare earth–iron intermetallic compounds R_2Fe_{17} (R=Y, Ce, Sm) 141
Nitrogen storage
nitrogen storage properties based on nitrogenation and hydrogenation of rare earth–iron intermetallic compounds R_2Fe_{17} (R=Y, Ce, Sm) 141

Optical properties
optical spectra of a $LaGaO_3$ crystal singly doped with chromium, vanadium and cobalt 262

Ordering of nitrogen
ε-Fe_3N: magnetic structure, magnetization and temperature dependent disorder of nitrogen 79
Oxides
synthesis and crystal structure of $Eu(ReO_4)_3(H_2O)_3$ and Eu_3ReO_8 120

Permanent magnetic material
structure change in Sm–Fe–B–Ti permanent magnet materials induced by HDDR process 277
Perovskites
spin-glass behaviour of disordered perovskite $LaNi_{1/2}Rh_{1/2}O_3$ 65
Phase diagram(s)
electrical conductivity measurements for immiscible In–Se–Te alloys 151
the ternary system neodymium–cobalt–boron 170
Phase equilibria
isothermal cross-section of the Ce-Ru-Si phase diagram at 600°C 147
isothermal cross-section of the Ce–Ru–Ge phase diagram at 600°C 155
Phase formation
phase formation and reaction kinetics in Co–Zn diffusion couples 164
Phase transformations
on the first incommensurate ordering of $NH_4Cu_{7-x}S_4$ 102
Porosity–microhardness relationship
porosity; microhardness correlation of sintered $(Al_{1-y}Cr_y)_2O_3$ solid solutions 211
$PrBa_2Cu_3O_x$
possible origins of superconductivity in $PrBa_2Cu_3O_x$ compound viewed from results of single crystal structure study 319
PrPdSb
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7
PrRhSb
neutron scattering studies on CeRhSb and PrTSb (T=Rh and Pd) compounds 7

Rare earth
magnetic transitions in B_{12} icosahedral boron-rich compounds TbB_{50} and $TbB_{41}Si_{1.2}$: Lattice constant dependence of the transition 32
Rare earth aluminides
magnetic properties of Nd_2Al and Gd_2Al 76
Rare earth intermetallic compounds
nitrogen storage properties based on nitrogenation and hydrogenation of rare earth–iron intermetallic compounds R_2Fe_{17} (R=Y, Ce, Sm) 141
Rare earth intermetallics
magnetic properties of Nd_2Al and Gd_2Al 76
Rare earth iron germanides
magnetic ordering in $HoFe_6Ge_6$ studied by neutron diffraction 50
structural and Mössbauer spectroscopic study of hexagonal Laves-phase $Zr(Fe_xCr_{1-x})_2$ alloys and their hydrides 42
Rare earth ruthenium germanides
isothermal cross-section of the Ce–Ru–Ge phase diagram at 600°C 155
Rare earths compounds
isothermal cross-section of the Ce-Ru-Si phase diagram at 600°C 147
Reaction–diffusion constants
phase formation and reaction kinetics in Co–Zn diffusion couples 164
Reactivity in solids
X-ray diffraction study of Ti–O–C system at high temperature and in a continuous vacuum 124
Reduction process
production of niobium powder by electronically mediated reaction (EMR) using calcium as a reductant 200
Remanence
investigation of simultaneous enhancement of remanence and coercivity in Nd–Fe–B/Nb mixed-powder sintered magnets 226
$RFe_{11.35}Nb_{0.65}C_x$
volume expansion and Curie temperature in $RFe_{11.35}Nb_{0.65}C_x$ compounds 57
Rhenates
synthesis and crystal structure of $Eu(ReO_4)_3(H_2O)_3$ and Eu_3ReO_8 120
Rhodium oxides
spin-glass behaviour of disordered perovskite $LaNi_{1/2}Rh_{1/2}O_3$ 65

Shock compression
metastable BCC and FCC alloy bulk bodies in Fe–Cu system prepared by mechanical alloying and shock compression 299
SHS
combustion synthesis of Zr–Si intermetallic compounds 238
Silicides
combustion synthesis of Zr–Si intermetallic compounds 238
Single-crystal X-ray diffraction
on the first incommensurate ordering of $NH_4Cu_{7-x}S_4$ 102
Sintered $(Al_{1-y}Cr_y)_2O_3$ solid solution
porosity; microhardness correlation of sintered $(Al_{1-y}Cr_y)_2O_3$ solid solutions 211
Sm–Fe–B–Ti alloys
structure change in Sm–Fe–B–Ti permanent magnet materials induced by HDDR process 277
Solid state reaction
metastable crystalline phases formed in the Fe–Ta system by solid-state reaction 159
Spin-glass
spin-glass behaviour of disordered perovskite $LaNi_{1/2}Rh_{1/2}O_3$ 65
Sr–Ir–O system
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
Stability
thermal cyclic charge and discharge stability of nanocrystalline Mg_2Ni alloy 312
Strontium iridium oxides
phase relations in the system Sr–Ir–O and thermodynamic measurements on $SrIrO_3$, Sr_2IrO_4 and Sr_4IrO_6 using solid-state cells with buffer electrodes 188
Strontium magnesium hydride
high-pressure synthesis and crystal structure of Sr_2MgH_6 197
Structure determination
high-pressure synthesis and crystal structure of Sr_2MgH_6 197
Superconductivity
possible origins of superconductivity in $PrBa_2Cu_3O_x$ compound viewed from results of single crystal structure study 319
Super-saturated solid solution
metastable BCC and FCC alloy bulk bodies in Fe–Cu system prepared by mechanical alloying and shock compression 299

Ternary alloys
electrical conductivity measurements for immiscible In–Se–Te alloys 151
Ternary phosphides
electronic and bonding properties of ANi_2P_2 (A=Ca, Sr, Ba) 88
Ternary system
isothermal cross-section of the Ce-Ru-Si phase diagram at 600°C 147
isothermal cross-section of the Ce–Ru–Ge phase diagram at 600°C 155

Thallium copper selenide
on the transformation of $TlCu_5Se_3$ to o-$TlCu_4Se_3$ 110
$ThCr_2Si_2$ type compounds
electronic and bonding properties of ANi_2P_2 (A=Ca, Sr, Ba) 88
Thermodynamic properties
evaluation techniques of cycling effect on thermodynamic and crystal structure properties of Mg_2Ni alloy 269
Thermodynamics
production of niobium powder by electronically mediated reaction (EMR) using calcium as a reductant 200
Thermodynamics of deoxidation
calcium-deoxidation of niobium and titanium in Ca-saturated $CaCl_2$ molten salt 173
Th_2Ni_{17}-type structure
structure change in Sm–Fe–B–Ti permanent magnet materials induced by HDDR process 277
Th_2Zn_{17}-type structure
structure change in Sm–Fe–B–Ti permanent magnet materials induced by HDDR process 277
Ti–Cr–V alloy
the hydrogen storage characteristics of Ti–Cr–V alloys 294
Titanium
calcium-deoxidation of niobium and titanium in Ca-saturated $CaCl_2$ molten salt 173
$TlCu_7S_4$
on the first incommensurate ordering of $NH_4Cu_{7-x}S_4$ 102
Transformation mechanism
on the transformation of $TlCu_5Se_3$ to o-$TlCu_4Se_3$ 110

UIrAl
influence of 5d-metal on magnetic properties of $UNi_{1-x}T_xAl$ compounds 36
UNiAl
influence of 5d-metal on magnetic properties of $UNi_{1-x}T_xAl$ compounds 36
UPtAl
influence of 5d-metal on magnetic properties of $UNi_{1-x}T_xAl$ compounds 36
Uranium intermetallics
influence of 5d-metal on magnetic properties of $UNi_{1-x}T_xAl$ compounds 36

Volume expansion
volume expansion and Curie temperature in $RFe_{11.35}Nb_{0.65}C_x$ compounds 57

X-ray diffraction
synthesis and crystal structure of $Eu(ReO_4)_3(H_2O)_3$ and Eu_3ReO_8 120
orthorhombic Er_2Ge_3, with a $ZrSi_2$–$DyGe_3$ intergrowth structure 183

YBCO
magnetic responses of a high-T_c semi-reversible YBCO superconductor 249
